

DWI COURT TECHNICAL ASSISTANCE

The National Center for DWI Courts (NCDC) provides **DWI court technical assistance** to aid programs that have taken the NCDC DWI Court Foundational Training in developing and implementing improved program practices. These improved practices lead to greater program effectiveness and increase long-term participant success.

NCDC technical assistance is **tailored to fit the needs of individual DWI court programs** and can include one-on-one consultation by phone, conference calls, regional training presentations, and on-site visits by trained, expert consultants.

DWI courts can benefit from technical assistance in areas such as:

- ✓ *Program eligibility and client screening*
- ✓ *Case processing*
- ✓ *Alcohol and drug testing*
- ✓ *Incentives and sanctions*
- ✓ *Effective treatment design and practices*
- ✓ *Cultural awareness*
- ✓ *Improved client retention*
- ✓ *Relapse prevention and aftercare design*
- ✓ *Training new team members*
- ✓ *Team-building and strategic planning*
- ✓ *Team member turnover*
- ✓ *Program sustainability*

The mission of NCDC is to provide training and assistance for implementing new DWI court programs and improving existing programs. Thanks to the support of the National Highway Traffic Safety Administration, NCDC is able to assist DWI courts by providing evidence-based resources and best practices that will improve outcomes for program participants and improve both public health and public safety for our communities.
